

Correct Wear of Beret

Incorrect Wear of Beret

Breaking in a new Beret can take awhile - try this trick: After you've adjusted the tightening band to a comfortable fit and tied it off, dampen (not soak) the beret and place it properly on your head. Wear until dry. Berets are pure wool and will shrink considerably. Repeat if needed to get that perfect form-fit. Keep it on till it's dry or it may shrink too much to fit. When you have it just right, finish trimming off the "tail" on the adjustment band.
